Results 1 - 5 of 5 short listing

- 1** ADEPT: an agent-based approach to business process management 87%

N. R. Jennings , T. J. Norman , P. Faratin
ACM SIGMOD Record December 1998
 Volume 27 Issue 4
 Successful companies organise and run their business activities in an efficient manner. Core activities are completed on time and within specified resource constraints. However to stay competitive in today's markets, companies need to continually improve their efficiency — business activities need to be completed more quickly, to higher quality and at lower cost. To this end, there is an increasing awareness of the benefits and potential competitive advantage that well designed busine ...
- 2** Visualising and debugging distributed multi-agent systems 80%

Divine T. Ndumu , Hyacinth S. Nwana , Lyndon C. Lee , Jaron C. Collis
Proceedings of the third annual conference on Autonomous Agents April 1999
- 3** Using singular value decomposition to visualise relations within multi-agent systems 80%

Michael Schroeder
Proceedings of the third annual conference on Autonomous Agents April 1999
- 4** The impact of object technology on commercial transaction processing 77%

Edward E. Cobb
The VLDB Journal — The International Journal on Very Large Data Bases August 1997
 Volume 6 Issue 3
 Businesses today are searching for information solutions that enable them to compete in the global marketplace. To minimize risk, these solutions must build on existing investments, permit the best technology to be applied to the problem, and be manageable. Object technology, with its promise of improved productivity and quality
